Michael Cole Goes on a Slammy Rampage: Why Vince McMahon's WWE Hall of Fame Ceremony Had to Be This Way Before the WWE Hall of Fame ceremony last night, there was some mention of an announcement on WWE.com. The website went down and didn't reappear until the beginning of the show. Instead of the website announcement, Michael Cole was played a package of clips from the past 24 hours, including going over the current state of WWE's creative direction and his prediction of the evening's major moments. Cole would then go on to ask his first question: "What can we expect from the WWE Hall of Fame?" "First and foremost, the biggest news of the year, the only major news of the year," said his opening line. "The biggest story of the year, the most important story of the year, is that there's going to be a new WWE Hall of Famer, not named The Rock. The new WWE Hall of Famer is going to be Linda McMahon." Cole then went through some facts about Linda McMahon and her career and how she has helped the WWE, the business she's been in, her family, etc. At this point, he asked Vince McMahon if it's true that Linda McMahon will be inducted into the WWE Hall of Fame. Vince McMahon confirmed that it's going to happen. A title was then shown with the number 41 on it. Cole asked if that means The Rock will be inducted on the April 5th Raw, but Vince McMahon denied that, saying it's simply a number. The CM Punk and John Cena segment from last night's Raw aired and ended with the crowd in a deafening ovation. Cole talked about the recent sign of movement in the WWE. "You can't deny that movement and momentum, whether you like it or not." The Rock would be the recipient of that movement and momentum. "The number one news of the year is, there's going to be a new WWE Hall of Famer. The next day, the next day after the Hall of Fame ceremony, The Rock will officially be crowned

You can also import raster images (PNG, JPEG, TIF, BMP) and vector files (SVG, PDF, DXF, DWG, DWF) and combine them with other markedups using the Markup Assistant. The Markup Assistant simplifies importing markedup layers and parts from a partner design that does not contain a CAD database or plans that use a different CAD software. The Markup Assistant also simplifies importing markedups on multiple
