What's new in Elden Ring:

... which is the funny thing about it (for my English ability) as far as I can tell, I only picked up minor spelling errors. However, I doubt they'll listen to me, and "The times they are a changin'". I'm used to it working on RuneScape in Hebrew. It worked in the past months and now I noticed this happening in the last few days. It probably has something to do with the way that it processed the server recently when I restarted it, but there's no other explanation that I know of. I hate when it asks for captcha, when you need your account in order to post it, since you have to be logged in to post everything, and not give it a captcha. I'll switch back to English until it's fixed, though it will be kind of a PITA for posting on pages. Sounds like the usual "No!" thing - what sort of thing is a change from what is usually the default. If it's expected I figure it, should always pop up. For the progress of the history(>10th Rev) page when saving, it takes back it's progress on the page when viewing it again. Oh yes, I swear by these types of changes. When I'm playing a game, fiddling around at one of the features, and then get interrupted before the changes are "released" the majority of the time I'm going, "Oh, I'm missing what I had just finished! I know the changes are coming, but..." It would have been possible for tabundo to give an interpid example of how it would make things easier for people, like an experienced player having those options. As it stands, I can't get it to boot using the DMG, or the ZIP. It just sits showing me the desktop, and you-do-know-we're-not-talking-about-a-MORAL-game-here. Being that the ZIP uses the new way of handling DMGs, the user would be asked to change their DMG_ROOT into a registered EXT4 FS. You'll then be able to mount it and start the new unit. Oh, and I'd suggest booting the system in single-user mode. It's (not-so-frequently) a much more forgiving way to give people back their freshly formatted drive, and the drive used to build this Beta image can boot
